

PS PubSTRAT

Sylogent's PubSTRAT application manages and streamlines the manuscript review and approval process from manuscript planning through final submission. PubSTRAT facilitates collaboration between stakeholders and provides visibility into the status of manuscript preparation and review throughout the process. Flexible and configurable, PubSTRAT allows your organization to easily modify processes as regulations or internal requirements change. Whether you are driving the manuscript publishing process, reviewing a manuscript, or require a top level view of the medical affairs department, PubSTRAT provides the visibility and project management functionality you require.

PubSTRAT provides:

[An intuitive user interface that requires minimal training](#)

[Built-in compliance throughout the publishing process](#)

[Seamless integration with Sylogent applications SAM and JSCA](#)

[Innovative topic search capability](#)

[A powerful suite of reporting tools that enable real-time data and reports at any point in the publication lifecycle](#)
